FLOWER LOVER

WE LOVE

We love design

Simply clever lines. Stylish highgloss metallic surface.

We love plastic

UV resistant, weather-proof, lightweight yet durable. Plastic yet lovable!

We love to play

Combine diverse shapes and sizes to make unique sets. Go crazy!

We love space

Outside or the inside. Patio, shelf or bathroom floor. Table, window or as a lovely gift. Nothing is impossible!

We love to grow

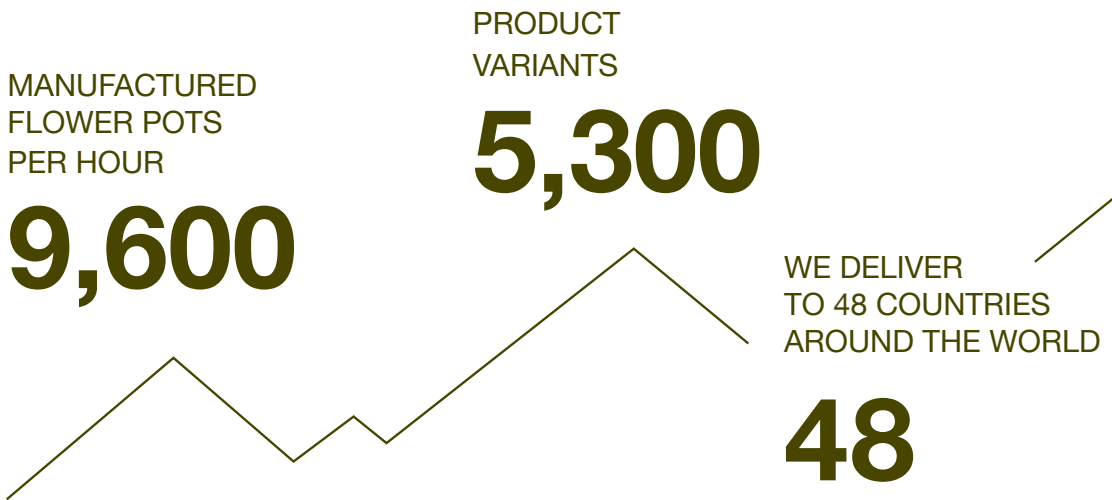

Years of experience led to the development of Flower Lover integrated sub-irrigation system. Balanced technically to suit most plants. Integrated aesthetically to please your heart.

FLOWER LOVER

YOUR SUCCESS IS OUR GOAL

We are a family enterprise with a long tradition. We have an understanding for our customers. We look for solutions and do not hide from problems. You will not find any corporate structure with us.

We want to inspire you and support your sales both with marketing tools and analyses and support at the point of sale.

Our manufacturing is in the EU

All our flower pots are 100% recyclable

73 % of our employees are women

“In Plastkon, we do not compromise between quality, experience and design. It is also really important to us to have a professional and reliable business relationship with all our clients.”

David Hama
Managing Director

We are always fair! We aim to build long-term relationships and develop joint business.

We are a Czech company, so we can offer you convenient delivery conditions and react flexibly to your individual requirements.

We occupy a stable second place on the European market in premium functional plastic flower pots.

FLOWER LOVER

SELF-WATERING SYSTEM

Our wide range of flower pots offer both interior and exterior solutions for your plants. Each product ensures maximum care for your plants thanks to the unique and accurate self-watering system. Last but not least, the great design of our products will enliven your apartment and garden.

Twist Liner

*Cobble

Moisture-absorbing wick

The moisture-absorbing wick will ensure a long life for your herbs. It turns occasional watering into continuous irrigation and thus brings the plant closer to its natural conditions in nature.

Small Liner

*Cubico Small

Moisture-absorbing wick

A way of keeping plants healthy when we can't take care of them every day. Thanks to the hydrating wick, your plants will be supplied with the necessary amount of water even while you're on vacation.

Separator

*Cubico / Quadrato

Water level indicator

The indicator allows you to see the current water level and shows the recommended minimum and maximum levels of water using the red lines on the crystal clear tube.

The sole purpose of the two spacer plates is to make sure the indicator is always in a perfect vertical position. But do not worry, this piece is provided already assembled for you!

Large liner

*Quadrato High

Separating grate

The large liner and grate only systems are equipped with the separating grate. The carefully located conic holes allow the flower's roots to reach the water and hydrate. Simple, as nature intended!

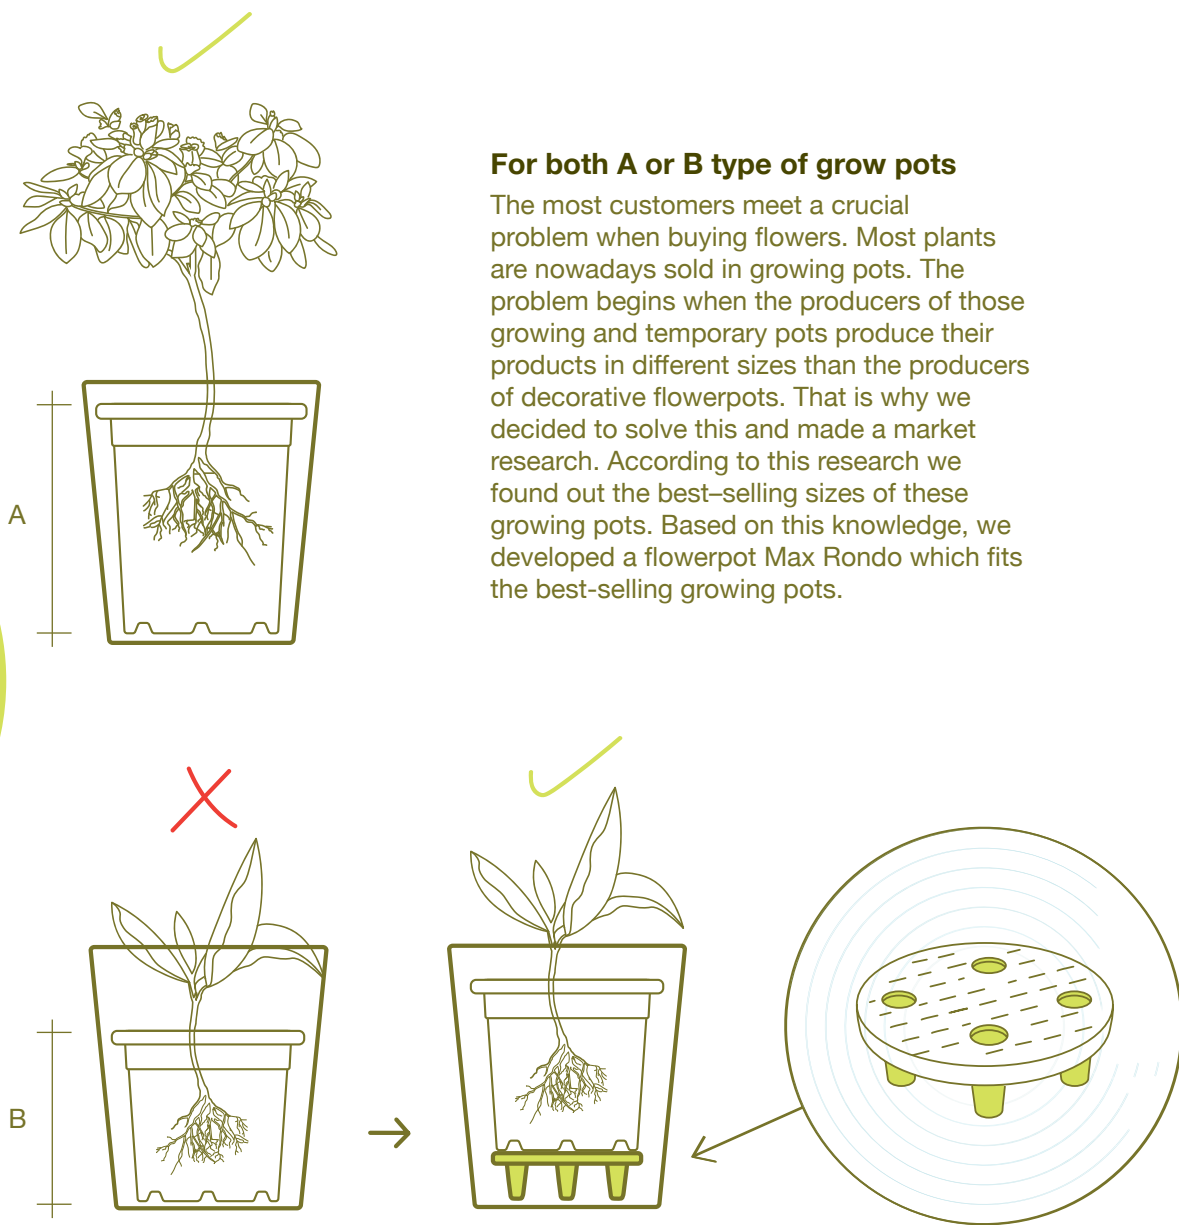

Hydro power

*Supreme / Rondo

Variable

*Rondo

Cubico is synonymous with perfect proportions and sharp edges, which makes it a great addition to the home with a wide range of uses, in eight different sizes.

FLOWER LOVER

PRODUCTS

In today's market, you will find a very small number of producers of similar products. As far as competition goes, certain differences arise. The first and biggest difference is that you have to assemble the purchased product yourself at home, because it is sold in parts. Another difference is in the water level indicator, which is not integrated but protrudes like an antenna. There are often problems with small children breaking these protruding parts or pets destroying them. Then you have to buy spare parts that cost you extra. An equally important difference is that competing brands only include one funnel on the top part of the product. The problem occurs during watering when the product is hung at a greater height, causing water spills. For this reason, Plastkon has developed the Cobble with two holes, one at the top and the other on the side, into which the spout of a watering can fits perfectly.

PLAYFUL

FLOWER LOVER

COBBLE

Today there is a growing trend to have fresh herbs available at home. Everyone wants to have organic and fresh ingredients at home when cooking. Under normal circumstances, when you buy herbs at the supermarket, they do not remain fresh or survive in the pot for very long and soon die without repotting. In case you decide to repot, other issues arise: By buying potting soil that is only sold in large 25 kg packages, you are likely to make a mess and spend time cleaning it up. That's why our company has developed this smart pot. It solves this fundamental problem by you simply buying a plant, placing it in the pot, we call it Plug & Play, and it is ready to use within 30 seconds.

The Cobble design features a combined matte and glossy surface for a modern look using laser engraving, which is very popular among our clients.

FLOWER LOVER

MAX RONDO

MAX RONDO

We performed a market analysis, during which we found the best-selling sizes of container pots and according to the data, we designed and developed a decorative pot that is compatible with container pots. So the only thing the customer has to do is to buy a plant, bring it home and just put it in our Max Rondo. From time to time, the container pot is lower. In such a case just use the enclosed dividing grate and even a lower flower pot fits perfectly.

MAX RONDO HYDRO POWER

For our more demanding clients, who would like to re-plant their flowers, we have designed the Hydro Power self-watering system, which is fully integrated into the product and does not impair its beautiful design. After watering the plant, the float in the water level indicator is pushed up and the indicator colour changes from orange to green.

FLOWER LOVER

CUBICO

Perfect proportions that allow a wide range of uses. The beauty of CUBICA is enhanced by especially sharp edges that you simply will not find in competing brands. Small, medium, large cubes – you watch them and want to play. Enjoy the pleasure of your own creativity. Enliven your apartment with a self-watering pot featuring a shiny finish. It does not have a drain valve and is therefore primarily intended for indoor use. A self-watering set comprising a grate that separates the soil from the water reservoir, a filling tube with a level indicator.

FLOWER LOVER

SUPREME

After some time, when your flower has withered and has to be replaced with a new one, repotting is necessary, and pots containing potting soil and the plant are often very heavy and difficult to repot. That's why we've developed removable inner containers that you just pull out by the handles, take to the garden and repot.

In order not to disturb the design of this product, the horizontal and fully integrated Hydro Power self-watering system was developed, which shows the water level and lets you know when to water the flower with the help of a float and the subsequent colour change from orange to green.

Supreme is adapted for both indoor and outdoor use, where you only need to open the drainage hole to drain excess rainwater.

FLOWER LOVER

QUADRATO

QUADRATO

The simple and delicate shapes will beautifully complement your interior. Its design provides a large volume for the plant while saving space. These pots come in a shiny finish. It does not have a drain valve and is therefore primarily intended for indoor use. The set includes a decorative pot and a self-watering set including a separator that separates the soil from the water tank, a filling tube and a water level indicator.

QUADRATO EASY

These pots come in a shiny finish. They do not have a drainage valve and are therefore primarily intended for indoor use. The self-watering set is not included. It can be purchased separately as an accessory.

Max Rondo is designed so that you can fit most container pots your store-bought flowers and plants come in, so you don't have to deal with complicated repotting. It is designed for larger plants, so we have added wheels, which allow easier handling of the pot.

FLOWER LOVER

POINT OF SALE DISPLAYS

We offer above-standard packaging services that we are able to implement according to your requirements. Product itself, but also its presentation should stand out from the series. Attractive and interesting packaging significantly support the customer's purchase decision.

VISIBILITY

We will help you with the sale and presentation of a product

Stands with your own print can be specially.

You can display the product displays immediately in your store.

Customers can view products from all sides.

Displays save shelf space.
